CYGNOS

CYGNOS CORPORATE CIRCULAR

September 25, 2006

We are pleased to announce a number of changes and updates at Cygnos IT Security.

NEW OFFICE LOCATIONS:

Effective October 10th Cygnos will be moving to a new and larger location, at Richmond Road and Island Park Drive in Westboro, Ottawa (see above for exact address). The office is a former medical building, purchased and renovated to accommodate our growing needs. Cygnos will retain our facilities secret clearance and renovations will continue into the fall providing additional on-site secure discussion areas and training rooms.

Furthermore, in December, Cygnos will establish a satellite office in Toronto with local representation and service offerings including IT Security Training.

CLIENT AND SERVICES UPDATES:

This past year Cygnos realized a 40% increase in revenue and established relationships with more than 20 new clients in the Government, Health Care, and Financial Sectors.

Our service offerings have continued to evolve with a strong emphasis on Certification & Accreditation, MITS Compliance, and Risk Management engagements. The addition of three new full-time security practitioners and a client relationship manager ensures the consistency and continuity of our projects.

CLIENT RECOGNITION:

Cygnos is also pleased to announce that we have been selected as *Vendor of the Year* by the Royal Canadian Mint, for excellence and value in services exceeding expectations. Our relationship with the Mint reflects the commitment and dedication we bring to all our clients.

PARTNERSHIPS AND TRAINING:

Cygnos is a major sponsor at the *Secure Toronto* symposium in October, held by the ISSA ISC². Salim Douba, Cygnos CTO, will be a keynote speaker, details can be found at www.isc2.org/events

We have also established strategic partnerships with **IBM Global Services**, and **Novell Corporation**. While protecting our integrity as an independent third party who does not resell, nor recommend security products, our partnerships with IBM and Novell extend our reach into new markets. Cygnos now provides complementary, end-to-end services in the areas of Security Event Management, Risk Management, and Hosted Security.

CYBER-PROTECTION SUPPLY ARRANGEMENT (CPSA):

We are extremely pleased to announce that we have been selected as a qualified vendor on the CPSA on Work Streams II and III (Project Services and Skilled Services). The CPSA provides a common unified means of procuring professional IT Security Services for all Government Departments and Agencies.

CPSA WORK STREAM II CATEGORIES:

1. IT Security Team Leader
